The reporting requirements listed above are in addition to the data collected by the agency's annual report and final report requirements for the grantees. The information will help NSF report on NIN activities in the Biennial Report to Congress (as mandated by the AICA), and will provide managing Program Directors a means to monitor the progresses of these I-Corps Hubs. Finally, in compliance with the Evidence Act of 2019, information collected will be used to satisfy other Congressional requests, support the agency's policymaking and internal evaluation and assessment needs, and respond to inquiries from the public, NSF's external merit reviewers who serve as advisors, and NSF's Office of the Inspector General.

Information collected will include the names of the participants, their affiliated organizations, email addresses, and home states. These personally identifiable information (PII) are collected primarily to track recipients in their roles in the I-Corps Teams, and to allow NSF to perform due diligence and quality control on the data provided by the grantees. In addition, other requested information includes the participants' self-reporting of: occupation, gender, demographics, disability status, and veteran status. This information is collected primarily for Congressional reporting purposes. These PII data will be accessed only by the I-Corps Hubs, the managing I-Corps Program Directors, NSF senior management, and supporting staff conducting analyses using the data as authorized by NSF. Any public reporting of data will be in aggregate form, and any personal identifiers will be removed.

Use of the Information: The information collected is primarily for the agency's AICA Reporting requirements, and other Congressional requests.

Estimate burden on the public: Estimated to be no more than 300–400 hours per award, per year, for the life of the award.

Respondents: I-Corps Hubs Grantees (Each Hub reports one set of data on behalf of the Lead and partner institutions of that Hub).

Estimated number of respondents: 10–15 hubs.

Frequency: Twice per year for the first year, then once per year thereafter.

Dated: August 25, 2022.
